

Use of Southern Star Central Gas Pipeline, Inc.'s *Land Use Development and Right-of-Way Handbook*

Southern Star Central Gas Pipeline, Inc. ("SSCGP") enjoys easements generally 66 feet in width, unless specifically noted otherwise in the applicable easements. As such, the Standard Encroachment Drawings provided on this site assume a 66-foot total right of way width, or 33-feet on each side of the pipeline, and are provided only as a guide to assist you in planning your project. To verify the right of way width in the area of your project, please contact the Land Representative nearest you.

You should also be aware that the SSCGP Engineering Department must review and approve the plans for any work within our rights of way at least 30 days before the beginning of actual work on the project. A specific Encroachment Agreement may be required prior to you beginning to work within SSCGP's right of way. Your Land Representative will be glad to visit with you regarding that agreement.
